Empower your non-profit's mission with Xelence

Automate operations, improve efficiency and streamline your mission-work with the communities you serve.

Harness the Power of a Low-code/no-code Platform

Xelence is an integrable cloud-based platform allowing you to develop, run, and manage applications without the complexity of building and maintaining the typical infrastructure of developing and launching an app.

Xelence provides all resources that enable you to deliver everything from simple applications to complex enterprise systems.

Scalable to Your Needs

Will your software solution need to scale from a proof-of-concept to thousands or millions of users?

Xelence takes full advantage of both horizontal and vertical scaling to allow you to harness as much horsepower as required.

Add more servers to your on-premise farm or cloud infrastructure and quickly deploy distributed services and apps with a few clicks.

Ongoing Automatic Security

When you deploy applications on Xelence, you get inbuilt security features.

Xelence strictly uses security assessment tools as part of the quality assurance process.

With every upgrade, customer applications automatically incorporate new security fixes.

Intuitive at All Levels

Xelence helps you build simple consumer to complex enterprise applications without traditional programming.

It is a visual environment, offering drag-and-drop features, and incorporates in-built enterprise architecture.

It helps you build apps without the skills of a programmer.

Xelence Benefits

Organisational

- **Improve your efficiency** by integrating systems and processes, reducing duplication and wasted resources
- **Coordinate efforts** between your different departments and work together more effectively towards common goals
- **Track and measure** the impact of your programs and services by analysing performance indicators and business processes
- **Use data effectively** by breaking down silos and integrating data across different departments and programs
- **Increase transparency** by sharing information across your organisation
- **Communicate effectively** with your stakeholders
- **Monitor progress and forecast** for the future with a holistic view of your organisation

Operational

- **Automate your paper-based processes** and gain real-time visibility into your operations
- **Collaborate and share information** between your teams, departments, and stakeholder groups
- **Analyse your data and improve** your practices
- **Scale your operations** to accommodate expansion
- **Comply with rules and regulations** and easily configure changes
- **Reduce your costs** and difficulties associated with physical storage
- **Improve your IT security** and reduce the risk of cyber-attacks and theft

Xelence Modules

Form Builder

- The Xelence form builder with drag-and-drop functionality helps you build and configure forms easily.
- Create the layout you want and style it with the inbuilt editor.
- Don't want to create a form from scratch? Xelence offers many templates to choose from and supports Bootstrap classes.
- Use step-by-step wizards that enable untrained users to create forms.
- Xelence forms are fully integrable with third-party programs and apps.
